The Perfactory Vida UHD cDLM is a high-speed continuous 3D printer with ultra high definition for the jewelry, dental and general manufacturing markets. This printer is the highest resolution offering EnvisionTEC’s patented Continuous Digital Light Manufacturing technology and also offers blazing speeds. In addition, the technology also reduces the need for support structures during 3D builds, meaning less finishing is necessary.

This groundbreaking technology allows for disruptive printing across a range of industries including dental, jewelry, and manufacturing.

As with all EnvisionTEC technologies, the Vida UHD cDLM delivers outstanding surface quality with no signs of stairstepping. The 33 µm resolution of the Vida UHD cDLM allows for high quality results from a manufacturer with more than 15 years of experience in 3D printing technologies.
