

EnvisionTEC expands its reach in the French dental market welcoming 3D printing distribution partner LYRA

Gladbeck, Germany. April 12, 2018 — EnvisionTEC GmbH today announced that it has expanded its reach in the French market with the addition of Paris-based LYRA as a new distributor of its 3D printing solutions for Dental and Orthodontic customers.

LYRA is an innovative technological company supporting the digital transformation of the dental industry. It supports the cross section of dental professionals: dentists, dental technicians, laboratories, clinics and hospitals to implement digital technologies.

The company will now sell and service the entire range of EnvisionTEC dental focused desktop and large frame 3D printers and materials. LYRA will provide product installation, commissioning and after sales services to the French dental space.

Olivier Rembry, Director of Business Development at LYRA said: “Our exclusive partnership with EnvisionTEC aligns us with the leaders in 3D printing for the Dental and Orthodontic sectors. We are looking forward to bringing our customers a new choice of professional grade, precision printers and materials”.

Anton Lopez, EnvisionTEC’s Regional Sales Manager for France added: “The agreement with LYRA will provide exciting new opportunities for customers to receive the high quality, high precision solutions that EnvisionTEC are renowned for. We see LYRA as a great partner in the French market because of its reputation, knowledge of the industry, service and support”.

About EnvisionTEC

EnvisionTEC is a leading global provider of professional-grade 3D printing solutions. Founded in 2002 with its pioneering commercial DLP printing technology, EnvisionTEC now sells a selection of 3D printers based on six distinct technologies that build objects from digital design files. The company’s premium 3D printers serve a variety of medical, professional and industrial markets, and are valued for precision, surface quality, functionality and speed.

About LYRA

LYRA is supporting the dental professionals (dentists, dental technicians, laboratories, clinics, hospitals) to implement digital technologies (scanners, intra-oral cameras, design software, 3D Printing, digital milling solutions) to produce high quality restorations. LYRA has patented the most efficient chairside milling machine in the market. LYRA is also developing disruptive solutions in implantology with its subsidiary ETK, a leader in smart implant systems and CAD-CAM prosthesis.
